

Cloudbuster™ Balloons & Kits

Cloudbuster Chloroprene Balloons are manufactured to professional standards. The raw materials used in producing these balloons help retard the sun's ultraviolet rays, while the slender neck makes inflation easy.

Cloudbuster Chloroprene Balloons

Item No.	Product Description	Printing	Price Per Piece				ABCD
			1	10	50	100	
4C	4-ft. Round Cloudbuster Balloon (Red, Blue, Yellow, Orange, Green, Purple, and White)	N/A	37.00	32.25	25.50	21.75

Order Placement and Policies

Helium

Helium tanks often can be rented from welding supply shops listed in Yellow Page directories. Different sizes of tanks are available and often can be delivered to and picked up from the event location.

Flying Times, Helium Requirements, and Shipping Weight

Item	Average Flying Time With Helium	Approximate Cubic Feet Helium Per Balloon	Approximate Shipping Wt./Ea. (Does not include weight of carton)
4-ft. Cloudbuster Balloon	4-5 days*	34	8 oz.
5½-ft. Cloudbuster Balloon	8 days*	87	11 oz.
5½-ft. Tri-Tone Cloudbuster Balloon	8 days*	87	13 oz.
8-ft. Cloudbuster Balloon	18 days*	267	23 oz.
Pennant Line — 100-ft. Line	N/A	N/A	15 oz.
Heavy Nylon Tether Line — 150-ft. Spool	N/A	N/A	16 oz.

*Conservative averages. Actual flying time will vary depending on inflation size, temperature, and atmospheric conditions. Cloudbuster balloons should be brought indoors during the evening and bad weather, including rain and wind.

Standard Packaging

Cloudbuster Balloons are individually polybagged. Kit items packaged separately.

Production Time

Approximately three working days from receipt of complete order.

Additional Product Information

Because the filling and usage of any large display balloon is beyond our control, no performance or longevity guarantee can be made. Balloons should be flown clear of poles, signs, trees, etc., to prevent damage. This product is not intended for re-use.
